Website Vulnerability Scanner Report (Light)

Unlock the full capabilities of this scanner

See what the DEEP scanner can do

Perform in-depth website scanning and discover high risk vulnerabilities.

Testing areas	Light scan	Deep scan
Website fingerprinting	✓	✓
Version-based vulnerability detection	✓	✓
Common configuration issues	✓	✓
SQL injection	–	✓
Cross-Site Scripting	–	✓
Local/Remote File Inclusion	–	✓
Remote command execution	–	✓
Discovery of sensitive files	–	✓

✓ **https://www.computeon.house/**

Target added due to a redirect from https://www.computeon.house

The Light Website Scanner didn't check for critical issues like SQLi, XSS, Command Injection, XXE, etc.
Upgrade to run Deep scans with 40+ tests and detect more vulnerabilities.

Summary

Overall risk level:

Low

Risk ratings:

Critical:	0
High:	0
Medium:	0
Low:	2
Info:	37

Scan information:

Start time:	Dec 30, 2025 / 23:22:19 UTC+02
Finish time:	Dec 30, 2025 / 23:22:49 UTC+02
Scan duration:	30 sec
Tests performed:	39/39
Scan status:	Finished

Findings

Unsafe security header: Content-Security-Policy

CONFIRMED

port 443/tcp

URL	Evidence

https://www.computeon.house/	Response headers include the HTTP Content-Security-Policy security header with the following security issues:
	`report-uri: report-uri is deprecated in CSP3. Please use the report-to directive instead.`
	`script-src: 'self' can be problematic if you host JSONP, Angular or user uploaded files.`
	
	Request / Response

Details

Risk description:
For example, if the unsafe-inline directive is present in the CSP header, the execution of inline scripts and event handlers is allowed. This can be exploited by an attacker to execute arbitrary JavaScript code in the context of the vulnerable application.

Recommendation:
Remove the unsafe values from the directives, adopt nonces or hashes for safer inclusion of inline scripts if they are needed, and explicitly define the sources from which scripts, styles, images or other resources can be loaded.

Classification:
CWE : CWE-693
OWASP Top 10 - 2017 : A6 - Security Misconfiguration
OWASP Top 10 - 2021 : A5 - Security Misconfiguration

Server software and technology found

UNCONFIRMED

port 443/tcp

Software / Version	Category
HTTP/3	Miscellaneous
LiteSpeed	Web servers
Open Graph	Miscellaneous
HSTS	Security

Details

Risk description:
The risk is that an attacker could use this information to mount specific attacks against the identified software type and version.

Recommendation:
We recommend you to eliminate the information which permits the identification of software platform, technology, server and operating system: HTTP server headers, HTML meta information, etc.

Classification:
OWASP Top 10 - 2017 : A6 - Security Misconfiguration
OWASP Top 10 - 2021 : A5 - Security Misconfiguration

HTTP OPTIONS enabled

CONFIRMED

port 443/tcp

URL	Method	Summary
https://www.computeon.house/	OPTIONS	We did a HTTP OPTIONS request. The server responded with a 200 status code and the header: `Allow: OPTIONS,HEAD,GET,POST` Request / Response

Details

Risk description:
The only risk this might present nowadays is revealing debug HTTP methods that can be used on the server. This can present a danger if any of those methods can lead to sensitive information, like authentication information, secret keys.

Recommendation:
We recommend that you check for unused HTTP methods or even better, disable the OPTIONS method. This can be done using your webserver configuration.

Classification:
CWE : CWE-16
OWASP Top 10 - 2017 : A6 - Security Misconfiguration
OWASP Top 10 - 2021 : A5 - Security Misconfiguration

CONFIRMED

Email Address Exposure

port 443/tcp

UNCONFIRMED

URL	Method	Parameters	Evidence
https://www.computeon.house/contact.html	GET	**Headers:** User-Agent=Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/108.0.0.0 Safari/537.36	Email Address: office@computeon.house Request / Response

Details

Risk description:
The risk is that exposed email addresses within the application could be accessed by unauthorized parties. This could lead to privacy violations, spam, phishing attacks, or other forms of misuse.

Recommendation:
Compartmentalize the application to have 'safe' areas where trust boundaries can be unambiguously drawn. Do not allow email addresses to go outside of the trust boundary, and always be careful when interfacing with a compartment outside of the safe area.

Classification:
CISA KEV: False
CVE : -1
CWE : CWE-200
OWASP Top 10 - 2017 : A6: Security Misconfiguration
OWASP Top 10 - 2021 : A4: Insecure Design

Nothing was found for vulnerabilities of server-side software.

Nothing was found for client access policies.

Nothing was found for robots.txt file.

Nothing was found for absence of the security.txt file.

Nothing was found for use of untrusted certificates.

Nothing was found for enabled HTTP debug methods.

Nothing was found for secure communication.

Nothing was found for directory listing.

- Nothing was found for passwords submitted unencrypted.
- Nothing was found for error messages.
- Nothing was found for debug messages.
- Nothing was found for code comments.
- Nothing was found for missing HTTP header - Strict-Transport-Security.
- Nothing was found for missing HTTP header - Content Security Policy.
- Nothing was found for missing HTTP header - X-Content-Type-Options.
- Nothing was found for missing HTTP header - Referrer.
- Nothing was found for passwords submitted in URLs.
- Nothing was found for domain too loose set for cookies.
- Nothing was found for mixed content between HTTP and HTTPS.
- Nothing was found for cross domain file inclusion.
- Nothing was found for internal error code.
- Nothing was found for HttpOnly flag of cookie.
- Nothing was found for Secure flag of cookie.
- Nothing was found for login interfaces.
- Nothing was found for secure password submission.
- Nothing was found for sensitive data.
- Nothing was found for OpenAPI files.

Nothing was found for file upload.

Nothing was found for SQL statement in request parameter.

Nothing was found for password returned in later response.

Nothing was found for Path Disclosure.

Nothing was found for Session Token in URL.

Nothing was found for API endpoints.

Nothing was found for missing HTTP header - Rate Limit.

Scan coverage information

List of tests performed (39/39)

- Test connection
- Scanned for unsafe HTTP header Content Security Policy
- Scanned for emails
- Scanned for website technologies
- Scanned for version-based vulnerabilities of server-side software
- Scanned for client access policies
- Scanned for robots.txt file
- Scanned for absence of the security.txt file
